## SUMMARY

---

Full-stack web developer with hands-on experience building production-ready applications using Next.js, TypeScript, and real-time backends. Delivered a live booking platform with payment processing and a personal finance app with 109 automated tests and CI/CD pipeline. Available for full-time or freelance remote work.

## TECHNICAL SKILLS

---

**Languages:** JavaScript, TypeScript, HTML5, CSS3

**Frameworks:** Next.js (App Router), React, Node.js, Tailwind CSS, Framer Motion

**Backend & Database:** Convex, Supabase, MySQL, PostgreSQL

**Auth & Payments:** Clerk, PayMongo API

**Tools & Testing:** Git, GitHub Actions (CI/CD), Vitest, Playwright, AWS SES, VS Code, Figma, Vercel

## EXPERIENCE

---

**Full-Stack Web Developer Intern** | *ServeBeez*

Feb 2026 – May 2026

*Next.js, TypeScript, Convex, Clerk, Tailwind CSS, AWS SES*

- Served as the full-stack developer on TripSulit (tripsulit.com), an adventure tour booking platform connecting Filipino travelers with tour organizers for hiking, island hopping, freediving, and more.
- Built end-to-end features across the platform including tour search and filtering, booking flows, wishlists, real-time messaging, and organizer dashboards using Next.js, TypeScript, and Convex.
- Implemented user authentication with Clerk, designed the real-time database schema on Convex, and integrated AWS SES for transactional email notifications.
- Developed responsive UI components with Tailwind CSS and shadcn/ui supporting mobile-first navigation, destination search, and a multi-step booking experience from browse to checkout.

## PROJECTS

---

**GastoGuard — Filipino Expense Tracker** | [gastoguard.vercel.app](https://gastoguard.vercel.app)

*Next.js 16, TypeScript, Convex, Clerk, Tailwind CSS, Recharts, Framer Motion*

- Built a full-stack personal finance app with 30+ features including expense/income tracking, budget management, utang (debt) tracking, savings goals, and recurring transactions.
- Implemented analytics dashboards with financial health scoring, cash flow forecasting, a GitHub-style spending heatmap, and a Spotify Wrapped-style annual summary.
- Wrote 109 backend unit tests (Vitest + convex-test) and 12 E2E tests (Playwright), with CI/CD via GitHub Actions. Conducted OWASP 2025 security audit covering CSP, rate limiting, and server-side validation.
- Deployed as a PWA on Vercel with Convex Cloud backend, supporting real-time sync, dark/light mode, voice input, and receipt photo upload.

**Kampo Ibayo — Resort Booking System (Capstone)** | [kampo-ibayo-resort.vercel.app](https://kampo-ibayo-resort.vercel.app)

*Next.js 16, TypeScript, Supabase, Tailwind CSS*

- Led frontend development in a 3-person team, building the customer booking flow, real-time availability calendar with conflict prevention, and responsive admin dashboard with financial reports and analytics for a live eco-camping resort.
- Implemented manual payment verification with OCR receipt scanning (Tesseract.js), an AI chatbot handling 200+ FAQs, automated email/SMS notifications, and a review system with photo uploads. 306 commits across the project lifecycle.

## EDUCATION

---

**Bachelor of Science in Information Technology**

June 2026

*Cavite State University — Trece Martires City Campus*
